

PRESS RELEASE

Dufenco Travi e Profilati obtained the EMAS registration for the San Zeno Naviglio plant

S. Zeno Naviglio (Brescia), March 5, 2021 – Dufenco Travi e Profilati **obtained the EMAS certification for the San Zeno Naviglio plant**. The registration was issued by the Italian EMAS Committee (ISPRA), after hearing the technical opinions of Arpa Lombardia and of the Environmental Certification Agency RINA. It verifies the compliance of the environmental management system and the validity of the environmental declaration. The latter gathers all the meaningful data about processes and production activities and the commitment towards further improvement.

The goal was achieved thanks to the cooperation of different teams and company offices, and confirms the quality of the **daily commitment of the Group to continuously improve the environmental performance**. It is a very important starting point for further targets to be reached through the investment for the new rolling mill, which will be operating by the end of 2022 and will be endowed with the most modern technologies also in terms of environmental impacts.

The CEO **Augusto Gozzi** commented: “This is a well-deserved result and certifies the steps ahead done thanks to the contribution of all the people working with us. It is a starting point for further goals that have been already set and will be achieved also through the ongoing project for the new rolling mill”.
